

It's not about going fast...

According to the MAIDS report 75% of all powered two wheel accidents were under 50 kph. The Hurt report found that the one-in-a-thousand crash speed is approximately 86 mph.

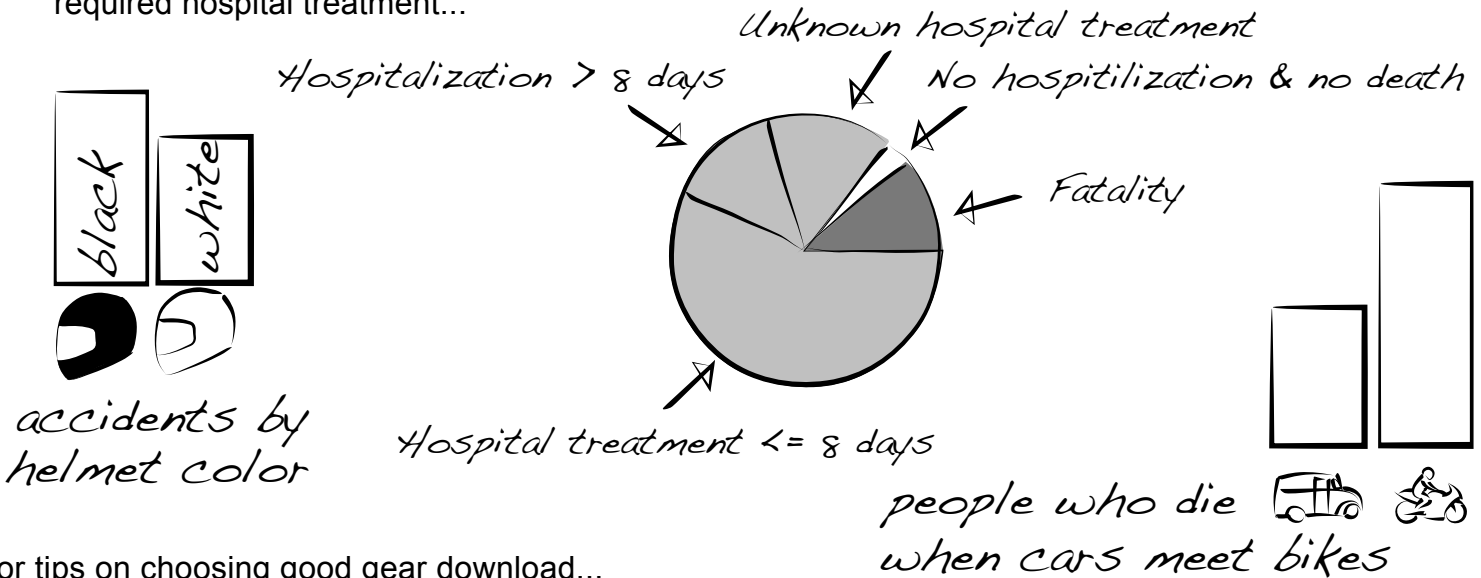

It's not about going far...

Most motorcycle accidents involve a short trip associated with shopping, errands, friends, entertainment or recreation, and the accident is likely to happen in a very short time close to the trip origin.

But a lot of it is about what you wear...

85.3% of the people in powered two wheel accidents required hospital treatment...
